

FOR IMMEDIATE RELEASE

ROVER PIPELINE PROJECT SENDS MORE THAN 65 MAPS TO PUBLIC OFFICES AND LIBRARIES ACROSS MICHIGAN

(Michigan) December 15, 2014 – Rover Pipeline LLC (Rover) announced today updated maps for the proposed natural gas pipeline are now available in multiple locations in each of the Michigan counties through which the route currently passes. The approximately 830-mile Rover Pipeline project will primarily serve domestic consumers by transporting natural gas from multiple gas processing facilities located in Eastern Ohio, Northwest West Virginia and Western Pennsylvania to markets throughout the United States, including Ohio and Michigan. Approximately 78% of the 3.25 billion cubic feet of natural gas moved daily through the Rover Pipeline will be utilized by domestic consumers. The remainder of the gas not consumed in the United States will be transported to the Union Gas Hub in Canada for trade in the open market which can either be used back into the United States, in Michigan, into the Northeast such as New York and New Jersey or to customers in Canada.

The approximately \$4.3 billion project will create up to 4,000 construction jobs in Michigan and an estimated \$154 million in local tax revenue paid yearly while the pipeline is in operation. The pipeline is expected to be in service in late 2016 and the first half of 2017. Rover has committed to using highly skilled, mostly local union labor to construct the pipeline.

The list of locations in Michigan where maps books are available for review are listed below. The most up-to-date information on the Rover Pipeline project, including fact sheets and maps, can be found on the Rover Pipeline website at www.energytransfer.com/ops_etover.aspx or by calling the project’s toll-free number at 1-888-844-3718. Information about the project can also be found on the FERC website at <http://www.ferc.gov/>, Docket No. PF14-14-000.
